

2002 Small Business Profile: OREGON

The events of 2001 posed critical challenges to the state of Oregon as well as the nation. Nevertheless, the economic health of Oregon benefited from its small businesses (those with fewer than 500 employees). Small businesses are an important source of new jobs in the state. The small business sector also provides opportunities for women and minorities and is a continual source of innovation and invention. These qualities proved to be economically beneficial to Oregon last year.

Number of Businesses. The number of employer businesses in 2001 increased by 0.4 percent, and the number of self-employed individuals decreased by an estimated 16.0 percent. Employer businesses numbered 99,943 in 2001. The most recent data by firm size (1999) indicate that 97.6 percent of businesses in the state were small. In 2001, an estimated 162,084 individuals were self-employed. (Source: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics)

Women-Owned Businesses. Women owned 27.6 percent of the state's firms in 1997 and generated \$10.3 billion in revenues. Of the state's total women-owned businesses, 15.9 percent had employees. (Source: U.S. Dept. of Labor, Bureau of Labor Statistics, U.S. Dept. of Commerce, Census Bureau)

Minority-Owned Businesses. The latest (1997) Census data indicate that minority-owned businesses totaled 18,200 and made up 6.2 percent of the state's businesses, of which 24.7 percent were employer firms. (Source: U.S. Dept. of Commerce, Census Bureau)

Business Turnover. In 2001, there were 13,246 new employer firms, or 10.1 percent fewer new employer firms than in 2000. Business bankruptcies totaled 1,389 in 2001, a decrease of 4.4 percent over 2000, while business terminations amounted to 15,512, a decrease of 3.7 percent over 2000. (Source: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau)

Employment. Small businesses employed 754,209 or 56.6 percent of the state's 1,332,403 employees (non-farm private sector) in 1999. The industry with the most small business employees was manufacturing. The total number of small employer firms in 1999 was 82,536 (Table 1). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses)

Small Business Income. Proprietors' income—a partial measure of small business income—totaled \$8.0 billion in 2001, an increase of 3.9 percent over 2000. (Source: U.S. Dept. of Commerce)

Finance. Often, small businesses use commercial lenders and rely on local bank services. Over the last five years, the number of banks in the state has decreased. The Office of Advocacy has identified the small-business-friendly banks within the state and has published the names in its banking studies report. (See Table 2 for the number of banks by asset size.) Small businesses seeking loans should also consider lenders that participate in the SBA's preferred or certified loan programs; for a list of these lenders, call the Small Business Answer Desk at (800) 827-5722.

For additional information on the Office of Advocacy's research reports, data, and analyses on small business, visit www.sba.gov/advo/stats or call (202) 205-6530.
